

Dear Sir/Madam,

We wish to make a short submission to the Review on Australian Aid.

Our principles are clear.

Australian taxes should not be used to support any aid agencies or associations that utilise funds for the following purposes, either directly or indirectly:

- Abortion - chemical or surgical - forced or voluntary
- Contraception - chemical or non-chemical
- Sterilisation - forced or voluntary
- Population control policies
- Eugenics policies

In addition, Australian funds should not be used to support nations with well-known human rights abuse records, such as China, or to contribute to nations where the funds will be used towards population control policies or other human rights abuses.

Yours sincerely,

Mr A.L.G. & Mrs C.V. Phillips
