Independent Review of Aid Effectiveness
GPO Box 887
Canberra 2601

Dear Panel

1. The need for Australian Aid is to make more of it available to NGOs in the countries receiving aid
2. There should be no reference to national interest of Australia in aid packages
3. Provide more money to help countries combat climate change
4. Ensure that large amounts of aid money are not spent on Australian firms doing feasibility studies and consultant reports
5. Ensure that Australian consultants do not recommend unsuitable technology or out of date technology to countries
6. Ensure that aid is targeted to sustainable development

Yours faithfully
James L. O. Tedder
